

02-08-2014

My name is Prof. Dr. Malimovka Y. And I am a director at the "Centro Medico Vasculary Y Proctologic" ("Meical Center Doctor HERRAIZ") which is recognized and authorized by the Consejeria de Sanidad de la Comunidad de Madrid. (No. dossier C.S 3827). Collegiate 12659. C / General Oraa, 68 28016. Madrid. Spain.

Our medical center has more than 39 years of experience doing treatments with a team of highly specialized professionals.

In the past few months I have been using the BRH-A1&BRH-A2 the Non-Invasive Sub dermal Ultrasound & Electro therapy system treating a few dozens of patients.

The BRH-A1&BRH-A2 are intended for use solely for Electrotherapy & Ultrasound therapy. The device is suited for continuous use

These devices gives a therapeutic effect during treatment. It converts electromagnetic energy to high-frequency sound waves that penetrate the tissues. The ultrasound energy is transmitted to the patient via a dedicated probe.

Initially I started by conducting a trial on a group of patients with different types of health needs. The results were extremely satisfactory.

There was a significant improvement in all subjective and objective parameters of care across treatment areas.

The patients treated with the device had significant relief from pain, signs of increased local microcirculation and returned to function much faster.

No side effects were revealed either during or immediately after the treatments.

No pain or discomfort was reported during the treatment period.

There were no complications on any of the patients treated.

The safety of the BRH-A1&BRH-A2 devices was impressive.

In conclusion, the BRH-A1 &BRH-A2 devices has significant potential as an efficacious, safe tool.

Thank you

Prof. Dr. Malimovka Y.
